

Solar Eclipse: 2024

The Arkansas Experience Inside & Outside Totality

Eclipse Program

With the Central Arkansas Astronomical Society Eclipse Team

We will be hosting a hands-on program and presentation about why eclipses happen, how to view the April 8th eclipse safely and what it will look like. Weather permitting, solar viewing will be part of the program. Created for school age children young and older, parents and adults are welcome too.

Presenters are Carl Freyaldenhoven, a retired science teacher who has been to seven solar eclipses and Darcy Howard, a retired science illustrator with a special interest in eclipses and solar astronomy. Both are NASA Partner Eclipse Ambassadors.
